

Product data sheet

External temperature sensor

Reference number

FF 7.8

External temperature sensor

for room thermostat ref.-no. 1790 RTR, TR D .. 1790 ..

spare part for floor thermostat ref.-no. FTR .. 231 ..

The sensor cable can be connected using a bifilar cable of 1.5 mm² in diameter that is suitable for mains voltage. When installed in a cable duct or near high voltage current cables, a shielded cable must be used.

Also suitable as external temperature sensor for the following KNX devices, ref.-no.:

.. 2178 TS .., .. 2178 ORTS .., .. 5192 KRM TS D, .. 5194 KRM TS D, 2177 SV R, 23066 REGHE, 23001 1S U, 23002 1S U, 39001 1S U

Technical data

NTC sensor in plastic cap 7.8 mm Ø

Cable length: 4 m

Ambient temperature: -25 ... +70 °C
