Sizes

Whether leisure or work, choosing the right glove size is important to achieve optimal protection and comfort. Therefore, you should definitely determine these before making a purchase.

We will show you how to determine your size yourself with the help of a tape measure.

To determine the size, you need a tape measure, which you place loosely at the widest point (the thumb excluded) around your hand. If you do not have a tape measure at hand, a Thread that you first put around your hand and then measure it with the help of a ruler (see picture).
