

OPTICS ACCESS CHAMBER 800 mm

This innovative connection manhole was created for fibre optic cables.

The optics access chamber is:

- made of: polyethylene (PE) using rotational moulding technology
- areas of use: optic cable continuation or reserve manhole
- weight: 14 kg
- diameter: 800 mm
- accessories: components include rubber penetration sleeves (2pcs)
- useful information: for 32 mm penetration sleeve use 48 mm milling cutter; for 50 mm penetration sleeve use 60 mm milling cutter
